

ENGAGE. COLLABORATE. ENABLE.

Extend your Logistics Product Data via dynamic electronic publications to support the design, support and operation of your complex assets.

Key Features:

- Improve the efficiency of your technical teams
- Integrate two proven technology products
- Seamlessly deliver approved quality technical data from a single trusted source
- Technical publications and training materials can be dynamically produced and distributed to end users of the asset
- These systems are designed to link engineering through to operational support

Data produced will meet the requirements of (as a minimum):

- ASD S1000D
- DEF-AUST 5629B
- CAWG CMP's
- C-01-100-100/ AG-002 dual column
- MIL-STD-3031
